CHAPTER 3		SECTION GES.303

DELEGATION OF RESPONSIBILITIES BY THE SMS

3.3.1 The people responsible for the application of the Company's Policies and

Directives are:

- General Manager
- DPA - Alternate
- Fleet manager
- Crew management manager
- Human resources management leader
- Superintendents
- Captains

3.3.2 The DPA must communicate the General Manager of all the significant changes relative to the SMS in each **annual revision made to the system.**

3.3.2.1 HSQE Management

HSQE Management team is composed by the DPA, Deputy DPA and HSQE Operators.

The responsibilities and functions assigned to the DPA in relation to the company's SMS are mentioned in chapter 04.

The responsibilities and functions assigned to the HSQE Operators in relation to the company's SMS are detailed below:

3.3.2.1.1. *Contribute to HSQE Management with the Maintenance of the Safety Management System through the control of documentation and processes; applying continuous improvement of the Systems.*

3.3.2.1.2. *Assist the DPA in the development of new procedures and formats or their enrichment to achieve excellence in safety, health, quality and the environment.*

3.3.2.1.3. *Coordinate, accompany external audits, and/or carry out internal audits of the office and fleet vessels.*

 Transgas	RESPONSIBILITY AND AUTHORITY OF THE COMPANY	
EDITION: 03		REVIEW: 00
ELABORATED BY HSQE Management		APPROVED BY General Management
CHAPTER 3		SECTION GES.303

3.3.2.1.4. *Archive the end-of-month documentation sent by the ships on the HSQE server. Analyze and respond to the Safety Committee and Near Misses, returning them with the comments issued by the office to the ship.*

3.3.2.1.5. *Investigate incidents that occur on ships and prepare final incident investigation reports.*

3.3.2.1.6. *Prepare Management of Change documents, Memoranda, Lessons Learned, and Safety Bulletins, as well as support the processes that require implementation due to them.*

3.3.2.1.7. *Provide induction to Captains and Chief Engineers in relation to the SMS in the absence of the DPA.*

3.3.2.1.8. *Cooperate in the preparation of final reports on the assessment of deficiencies imposed on fleet vessels by PSC, ASI, Flag or Classification Society on their behalf, and others. As well as, monitor the closure of NCs imposed on ships by external inspections such as Vetting, PSC, ASI, among other inspections.*

3.3.2.1.9. *Prepare all ISM and ISPS documents and materials when a new ship enters the fleet.*

3.3.2.1.10. *Contribute to the ship-shore link to facilitate access to ships of all information, documentation and manuals of SMS. As well as participating in crisis exercises and preparation of final reports.*

The entire HSQE Management team has certifications that accredit them as ISM – ISPS internal auditors, therefore, they are authorized to carry out internal audits on any ship in the fleet and office.

3.3.3. The Superintendents will be the direct contact between the office and the ships to attend the commercial operations and navigation of the ships assigned.

 Transgas	RESPONSIBILITY AND AUTHORITY OF THE COMPANY	
EDITION: 03		REVIEW: 00
ELABORATED BY HSQE Management		APPROVED BY General Management
CHAPTER 3		SECTION GES.303

3.3.4 Superintendents have responsibilities in relation to the Management System:

3.3.4.1 To keep complete efficiency and optimizing costs to minimum complying at all moments with the standards of safety and good service.

3.3.4.2 The persons designated by the General Manager will carry out Fleet / Technical Inspections according to the Annual Fleet / Technical Inspection Program and will report the results to the Fleet Management Committee. The elements that must be evaluated are the operation of the Ship, performance of the Main Machine, Discharge Pumps, Warehouse status, tanks, current consumption, speed etc; according to GR.35 format. They should place special emphasis on the need for Training they observed during their inspection.

In addition to the functions of the Fleet Manager, please review what is indicated in OPE 103 - Fleet and Technical Inspections

NOTE: In case of absence, the General Manager will be replaced by the Manager Commercial and/or Fleet Manager, the DPA for the Alternate DPA and the Fleet Manager for a Technical Superintendent designated by the Fleet Manager, and shall be reported using the REPLACEMENT OF OFFICIALS (FORM CAL.96).

3.3.4.3 To check the local and international regulations, class and flag, in order to ensure their observance by the ships. Likewise, maintain a relationship/direct contact with the Classification Society and with the Flag in order to always be informed and up to date.

3.3.4.4 To update the relevant characteristics of ships, such as changes in the hold's capacity, in tanks, structural modifications and expiration of certificates.

	RESPONSIBILITY AND AUTHORITY OF THE COMPANY	
EDITION: 03		REVIEW: 00
ELABORATED BY HSQE Management		APPROVED BY General Management
CHAPTER 3		SECTION GES.303

3.3.4.5 To visit the ships for inspection, keeping detailed information about repairs and entrances to the dry dock, making sure that both be programmed in the most convenient place and date.

3.3.4.6 During the inspections of ships analyze the performance of the trips and check the following records on board (not they limit to them):

- Deck log book
- Navigation procedures
- Engine room log book
- Oil Record book of Deck and/or Engine
- Revision of the maintenance program and VPES.

3.3.4.7 Maintain open channels of communication with ships and develop an area of Trust with the personnel of the Ship, in order to ensure that the Company's Guidelines are being complied with. Superintendents are the first line of communication with ships in case of any emergency. They should be familiar with all functional requirements for the Contingency Response Plan (SOPEP/SMPEP).

3.3.4.8 To monitor the safety system (SMS) verifying the revision of the SMS by the Captains.

3.3.4.9 To make sure that the standards of STCW and SMS Codes be complied with, and that the officers and crew on board the ships be certified and trained.

3.3.4.10 To report to the fleet management about the inspections and tests carried out to demonstrate that pertinent measures of maintenance, monitoring, and ships operational capacity are being taken.

3.3.4.11 To carry out Fleet Inspections of ships.

 Transgas	RESPONSIBILITY AND AUTHORITY OF THE COMPANY	
EDITION: 03		REVIEW: 00
ELABORATED BY HSQE Management		APPROVED BY General Management
CHAPTER 3		SECTION GES.303

3.3.4.12 Inspections of valuation in the buying and selling in representation of the Ship owners.

3.3.4.13 Inspections for verifying the compliance of the class.

3.3.4.14 To carry out periodic visits to get information about the operational dynamic.

3.3.5. Visit of a Senior Manager to a vessel of the fleet

The objective of this document is to ensure a detailed review of key aspects such as compliance with corporate policies, operational performance, customer satisfaction, compliance with regulations, crew well-being and effective interaction with onboard personnel. This guarantees the alignment of the ship with the company's objectives, promoting a positive and productive work environment.

According to our SMS, the senior managers are those mentioned as follows:

- General manager
- Fleet Manager
- Operations Manager
- Managers of Management Areas

The senior manager in charge will fill out the AU.01 form, which must be completed in all items and shared with the General Management and HSQE Management.

Below is a Detailed Guide for a Senior Manager's Visit to a vessel of the fleet:

1. Review of Business Policies and Objectives:

- *Verification of the ship's adherence to established corporate policies, including safety, environmental and quality regulations.*
- *Detailed evaluation of business objectives and their application in daily operations to ensure alignment with corporate strategy.*

 Transgas	RESPONSIBILITY AND AUTHORITY OF THE COMPANY	
EDITION: 03		REVIEW: 00
ELABORATED BY HSQE Management		APPROVED BY General Management
CHAPTER 3		SECTION GES.303

- *Discussion on the effective implementation of policies and the ship's contribution to achieving corporate objectives.*

2. Vessel Performance and Customer Comments:

- *Exhaustive analysis of the ship's operational performance, considering speed, load capacity, fuel consumption efficiency and navigation safety.*
- *Thorough review of customer feedback, complaints received and actions taken to improve satisfaction and service quality.*
- *Evaluation of complaint management and problem resolution processes to ensure a proactive approach towards continuous improvement.*

3. Result

- *Detailed inspection of recent audit results, including classification inspections, flag audits, PSC.*
- *Evaluation of the ship's class conditions, addressing technical, operational and safety aspects to maintain the required standards and class certification.*
- *Implementation of corrective measures based on audit findings to ensure compliance with current regulations and standards.*

4. New Regulations and Company Goals:

- *Comprehensive review of new relevant regulations and standards*
- *Evaluation of current corporate objectives and goals in terms of sustainability, operational efficiency and safety, aligning onboard practices with the company's global strategies.*
- *Development of specific action plans to address regulatory changes and achieve stable objectives.*

5. Crew Wellbeing and Meeting with Officers:

 Transgas	RESPONSIBILITY AND AUTHORITY OF THE COMPANY	
EDITION: 03		REVIEW: 00
ELABORATED BY HSQE Management		APPROVED BY General Management
CHAPTER 3		SECTION GES.303

- *Evaluation of the working conditions and well-being of the crew, considering aspects of health, safety, training and motivation to guarantee a positive and productive work environment.*
- *Strategic meeting with key officers to analyze human resource management, training, rotation and professional development issues, driving operational excellence and team commitment.*
- *Implementation of wellness programs and support measures to promote the mental and physical health of the crew, fostering a safe, inclusive and collaborative work environment on board.*

6. Interaction with the Crew and Informative Talk:

- *Conducting an open and participatory meeting with the entire crew to share the strategic vision, corporate achievements, current challenges and the key role of the crew in the ship's success.*
- *Detailed presentation of the functions, responsibilities and objectives of the senior manager, providing guidance and motivation to strengthen the commitment, cohesion and sense of belonging of the team.*
